Explore Lynx™ Fleet

The Lynx Fleet application intelligently monitors connected refrigeration systems from anywhere in the world. It provides vital information through a centralized data stream and with improved visibility for asset owners, producers, drivers, fleet managers and retailers on the products being transported and the delivery modes transporting them.

In addition to providing critical data, such as temperatures, location and movement of refrigerated assets, Lynx Fleet can provide analytics and diagnostic information.

The digital system provides access to near live service and maintenance schedules for each connected refrigeration unit, helping to aid fleet management procedures and ensure minimal disruption through vehicle downtime.

Capabilities

In development and accessible via desktop, smartphone or tablet, Lynx Fleet offers operators 24/7 access to a wealth of valuable data on their refrigeration systems, including but not limited to:

Advanced remote temperature monitoring

In-depth service and utilization reports

Operational management and control capability

Operational management and control capability

In-depth service and utilization reports

Preventative maintenance
